WELCOME TO THE K.B LUBRICANTS

Let's start by explanation of Who we are? & What we do?

What is K.B Lubricants Pvt. Ltd.?

- K.B Lubricants Pvt. Ltd is the Lubricants oil manufacturing and trading company since years.
- It was established in the year Sept. 2014.
- We deals with the high quality of motor oils for boosting their performance, protection them under the pressure for maintaining their proper performance.
- Currently our distributors consume more than 250 KL per Month.

How does it Works?

We basically works on the basis of two terms: Lubricant and Vasco.

❖ Lubricants:

It is basically define as a franchisee of our business given to the others who works in our name.

We provides 50 consumers to each of our Franchise out-lets.

❖ Vasco:

It is generally defined as a dealership of our business given to other dealers.

OUR CONCEPT

Our motto is to provide high quality of motor oils for boosting their performance, protection them under the pressure, for their smooth engine performance.

OUR MISSION

- ❖ **Quality product:** We are committed to deliver quality lubricant products to our customers in an efficient manner and at a best and affordable prices to meet customer satisfaction.
- ❖ **High Performance:** We aim to deliver the best lubricants oils for maintaining the high performance in your day to day operations.
- ❖ **Cost effective:** We believe in delivering products by following the cost effective strategy to maintain the faith among our customer and to create faith among new customers.
- ❖ **Environment friendly:** We follow environment friendly approach to work for our lubricants and dealing in our products.

OUR VISION

- ❖ **Better Quality:** We believe that quality is the most important factor of any product. We aim to serve the lubricants that which comprises of the high quality materials and reduce the consumption of the poor quality materials.
- ❖ **Alternative to Lubricant:** As we all know that high consumption of lubricants has a high impact on the society and the environment, so we vision to bring an alternative to lubricants that doesn't have an adverse impact on the society.
- ❖ **Reduction in the use of energy:** It is expensive to produce and deliver lubricants in terms of both time and cost. Therefore, it becomes essential we should develop a proper calculation for this. So that we can save energy in both the terms for future purpose.
- ❖ **Reduce Impact on Environment:** We aim to save our environment by reducing the use of harmful or poisonous products. We aim to prefer the use of bio degradable products, less harmful chemicals, which helps in protecting our environment.

**A picture is worth a
thousand words**
