Roy can introduce any number of members to Mosho, there is no limit. But Roy can introduce only 2 members directly under him (i.e. one on the Right and one on the Left).

# DIRECT INCOME

If Roy wishes to introduce further members under him then Roy can introduce him under most successive member under him. Roy will receive direct income for the members added under his successive members.

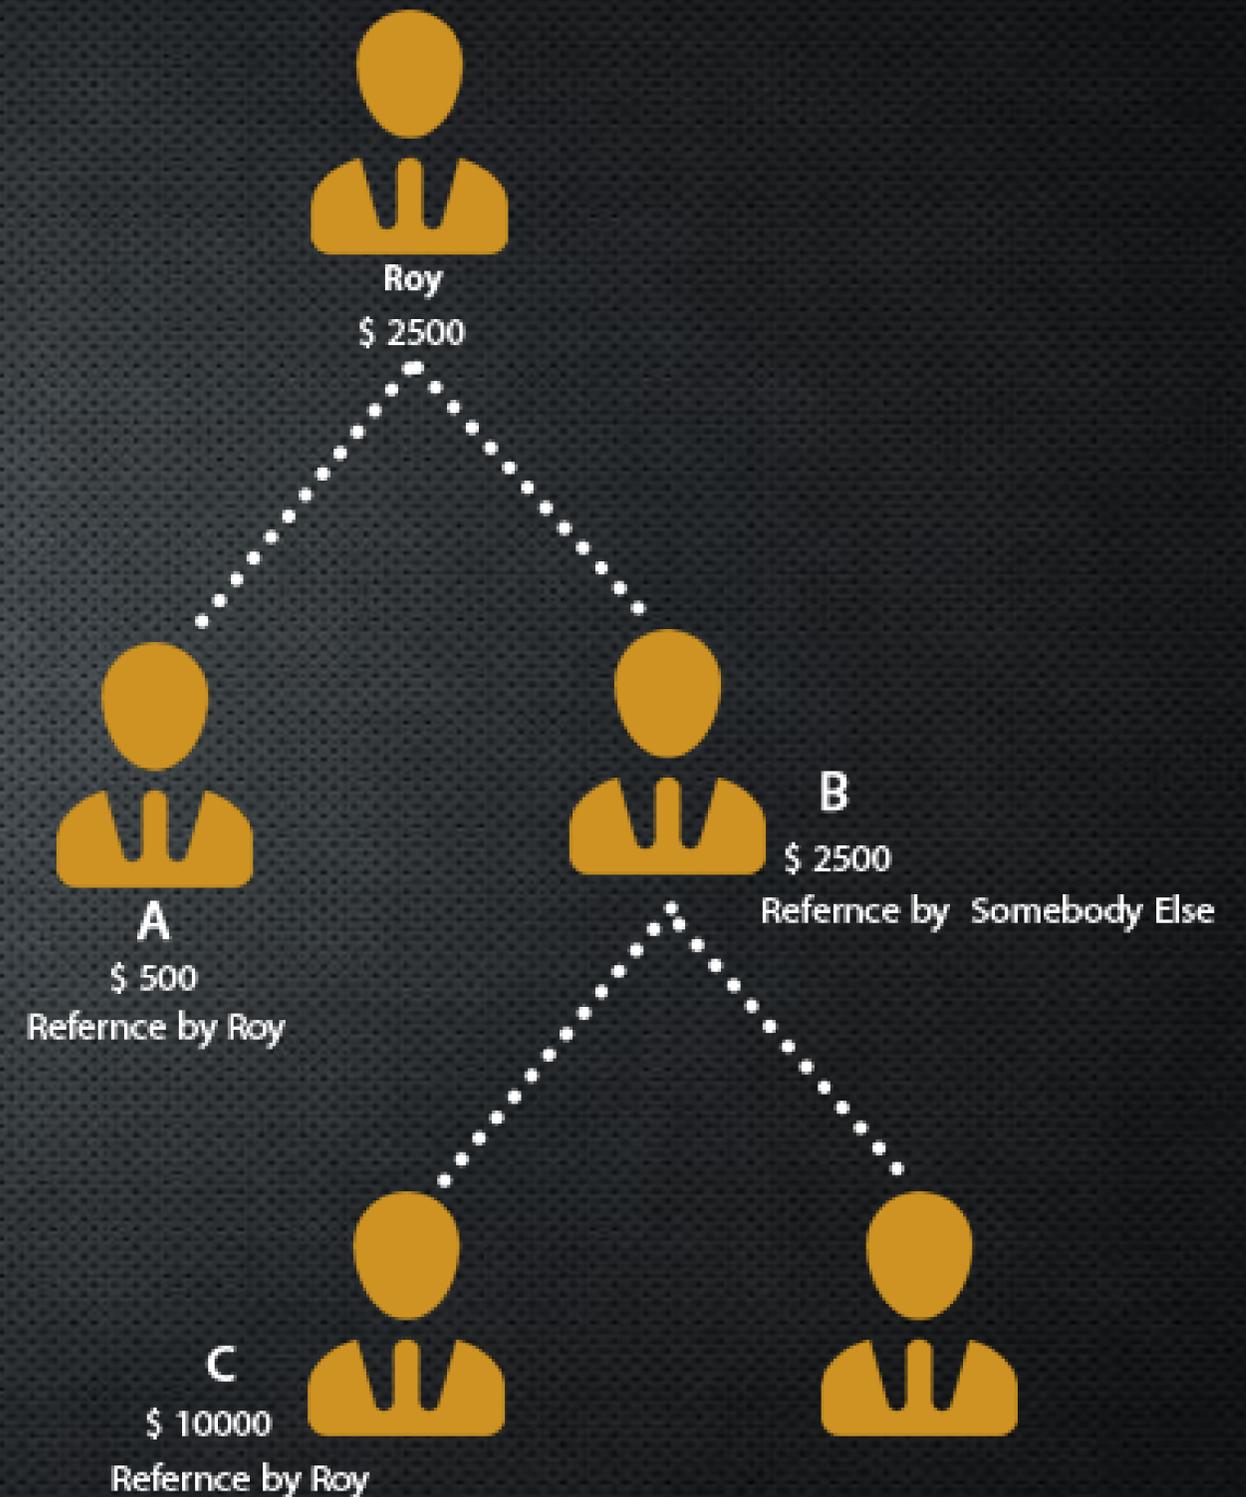

- In the Illustration:

Roy's package: \$2500 = 8%

Direct Income =  $\$500 * 8\% = \$40$

$\$10000 * 8\% = \$800$

Total Direct Income = \$840

Members who forms 1 pair becomes eligible for receiving a reward of \$10. Similarly if a new introduced does not forms a pair and is left out then it is carry forwarded for next day commission calculations.

1 Pair = \$10

10 Pair = \$100

## Daily Payout

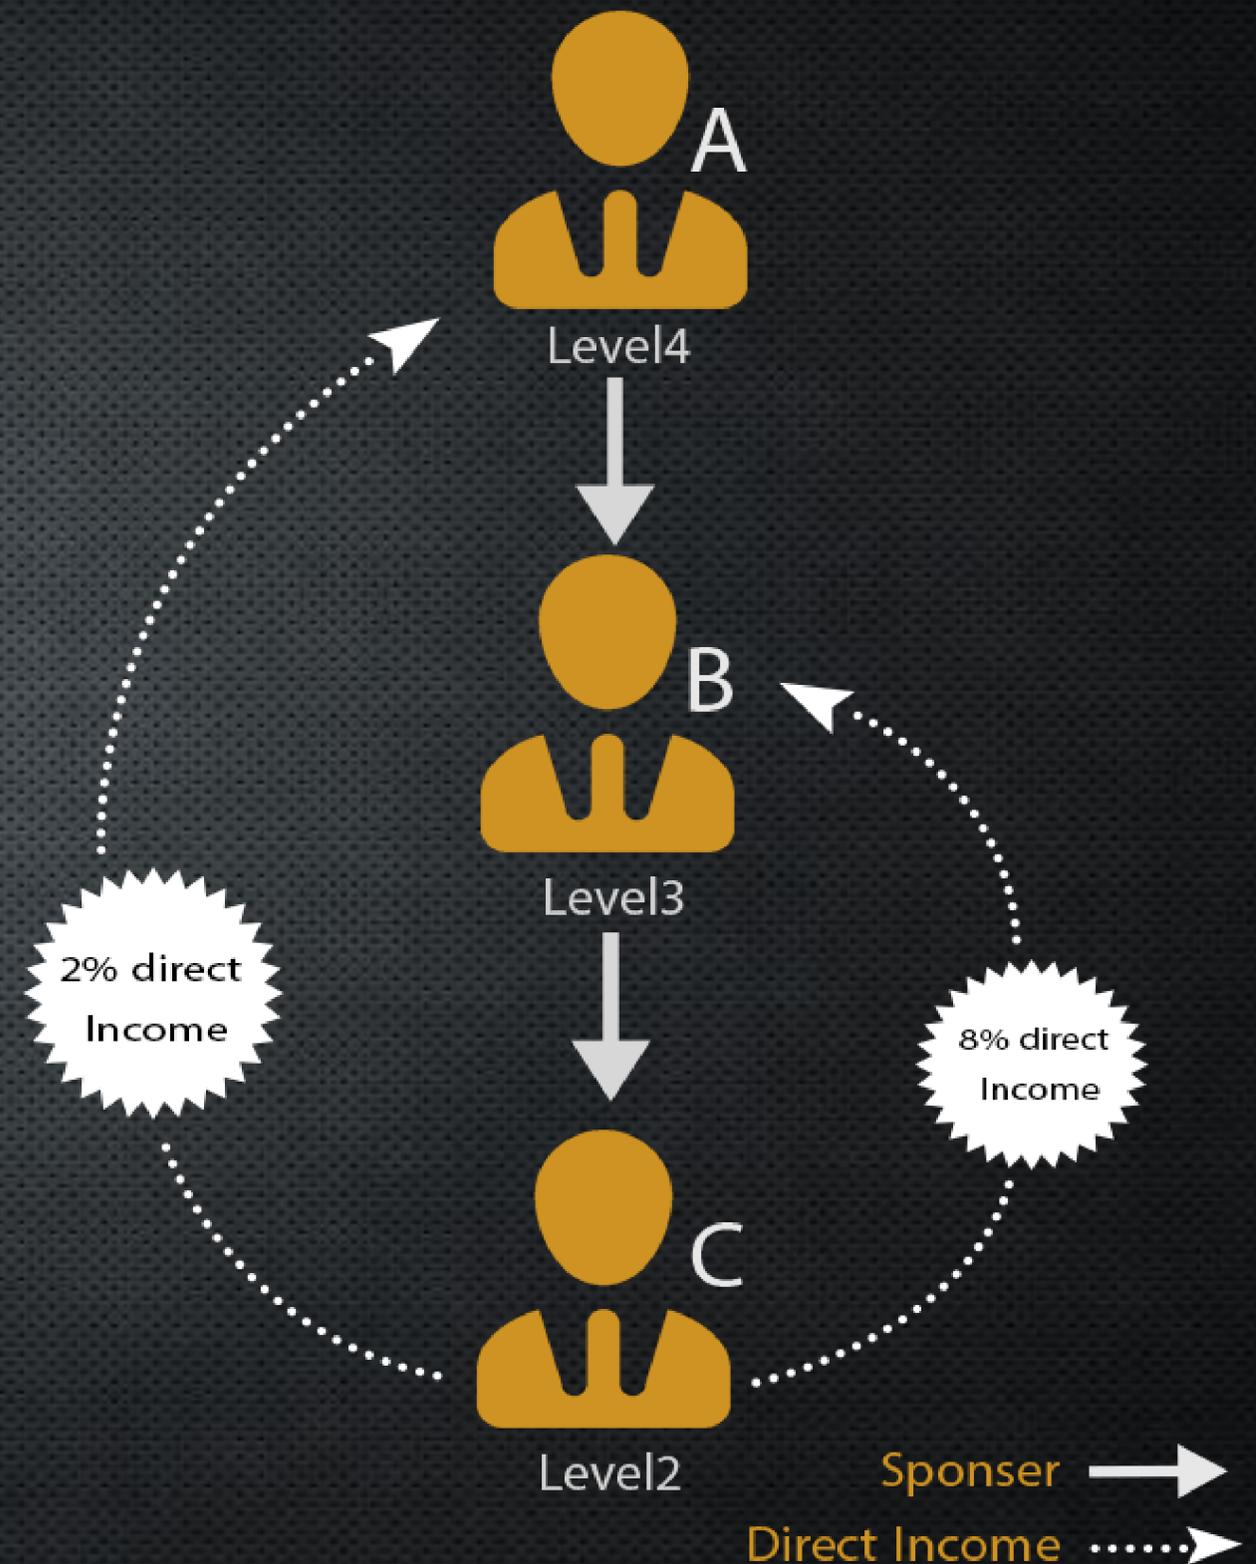

Matching bonus are paid out daily at the end of the day. They are credited on daily basis into your accounts.

Higher the level of investment the more will be the benefits of the member. Differential is one amongst those benefit. It is highly beneficial for our members with the higher level plans. It ranges from 5% to 10%. Though every new member receive 10% direct income which is bare by us for encouraging our members.

In this Our system searches for the higher package member from the direct sponsors and pay them Direct Income on the differential basis.

# DIFFERENTIAL

Let's checkout how the differential system works for our clients. This will help you to understand how it is beneficial for all the members in the line. In this Illustration:-

You sponsor A / A sponsors B / B sponsors C

B gets FTB (For C):  $500 \times 5\% = 25$

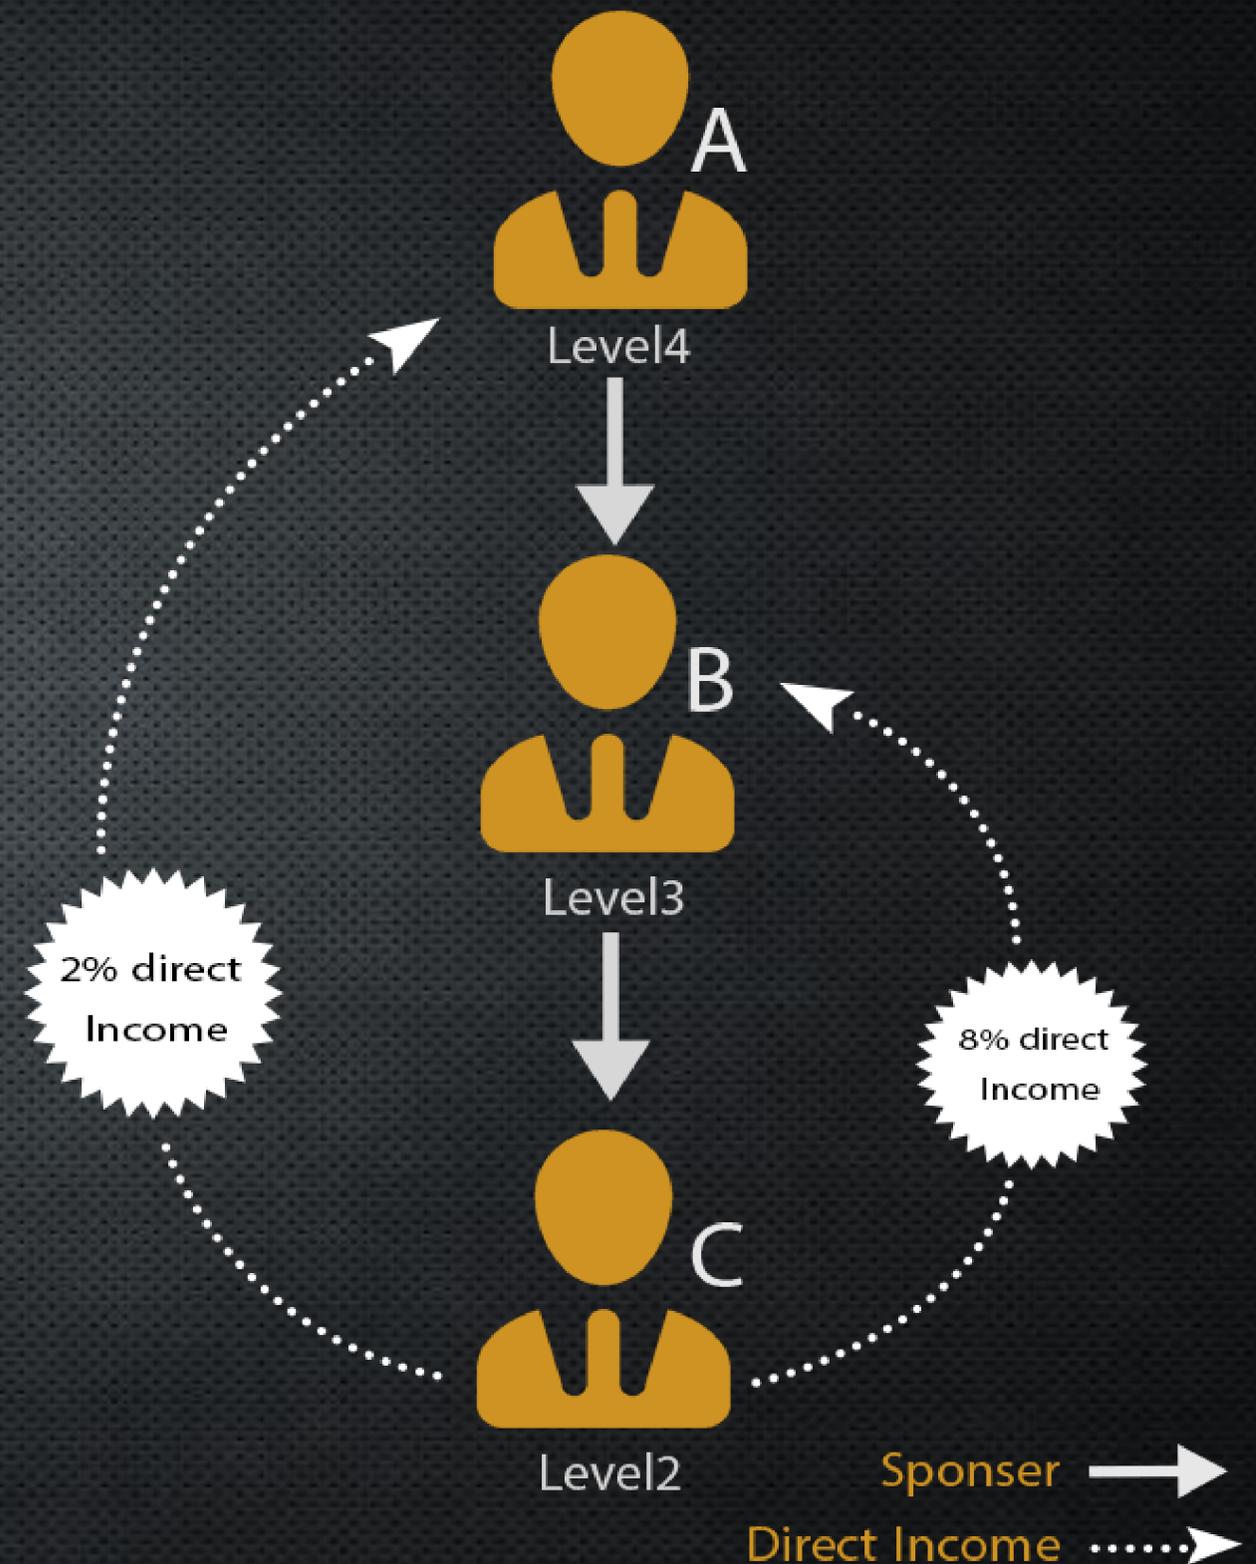

A gets FTB (For B):  $100 \times 8\% = 8$

A gets Differential FTB (For C):  $500 \times 3\% = 15$

You get FTB (For A):  $2500 \times 10\% = 250$

You get Differential FTB (For B):  $100 \times 2\% = 2$

You get Differential FTB (For C):  $500 \times 2\% = 10$
