WHAT IS STOCKFINEX?

Stockfinex is the one of the truly decentralized Revenue Sharing Platform, which creates global marketplace for Trade of Crypto Currency.

Founded in year 2017, designed as an Exchange Platform which provide the crypto market with an advanced technology to Trade and Exchange any form of Crypto currency and other Digital Assets conveniently. Our mission is to offer our platform as a service to deliver the most sophisticated, safe and stable instrument for Crypto currency Exchange.

One of the Professional platform to set up easy exchange of Crypto Currency by retaining interest in Crypto Currency. In this Platform, exchange on which the traders will be able to make Short Term Speculation on the price of Crypto Currency and there will be no commission on the transaction fees. This will allows all the professionals and traders to make rapid, small-profits trades that is something not easily possible in Today's market.

Any offer or solicitation will be made only by means of a confidential offering memorandum and in full accordance with the terms and conditions of all applicable securities and other laws existing at the moment.

WHY STOCKFINEX

Stockfinex follows the Revenue Sharing structure. It has the potential to share its Revenue directly to the professional without too many intermediary steps. It will be a new kind of revolutionary currency, solving the issues of the global economy.

Also security problems of other Exchanges Platform are not simply a technical challenge to be overcome, but also a social consequence for the professionals who desire to hold liquid assets in trading accounts. Our Platform is customized in manner to overcome difficulties involved in fulfilling the desires of major professionals.

Some of the additional factors which forces you to select Stockfinex as your first Crypto Currency Exchange and Trading Platform:

01

High Security

Security is vital when building any asset management platform. Our extension always try to implement multiple layers of validations and security to keep all our users data safe and secure. The extension also integrates security features to prevent spoofing. The NEX extension actively protects users from known scammers by forcing a redirect when it encounters a known malicious website. Our users can always have faith in us as we never fail to meet the standards set for keeping the data safe.

02

Robust Trading

Our custom trading and exchange platform is designed to be scalable and also it ensure all the orders from our users are executed quickly and in real-time. It is designed to provide ease in use by maintaining High UI/UX with responsive design. Also support third-party trading platforms and algorithmic trading. It also enables the creation of a safe, hyper-liquid and secure foundation for trading instrument like a crypto currency.

03

Corporate Responsibility

Security is vital when building any asset management platform. Our extension always try to implement multiple layers of validations and security to keep all our users data safe and secure. The extension also integrates security features to prevent spoofing. The NEX extension actively protects users from known scammers by forcing a redirect when it encounters a known malicious website. Our users can always have faith in us as we never fail to meet the standards set for keeping the data safe.

PLATFORM FEATURES

Exchange Technology:

Exchanges platform designed to provide services to buy and sell crypto currencies and other digital assets.

Exchanges play an essential role in the crypto currency economy by offering a marketplace for trading, liquidity, and price discovery. This Platform is robust, fault tolerant, scalable and highly secure.

Revenue Sharing:

Our platform distribute most of our Revenue to our shareholders. It helps Professionals to trade multiple type of Crypto Currency with leverage options. It will be based on SFX Tokens. Professionals can lend their SFX Tokens in our Revenue Sharing Program and will receive benefits based on exchange profit at that time.

Easy to Use:

It has conception of keeping things as simplistic as possible. It offers simple yet attractive UI/UX with responsive design by keeping ease of use in mind. Professionals can easily connect and enjoy using it.

Device Compatibility:

With their tremendous knowledge designers had made it possible to design a Platform which operate on all types of devices and web browsers. Its responsive nature made it easy to use it anywhere on any device without causing any problems.

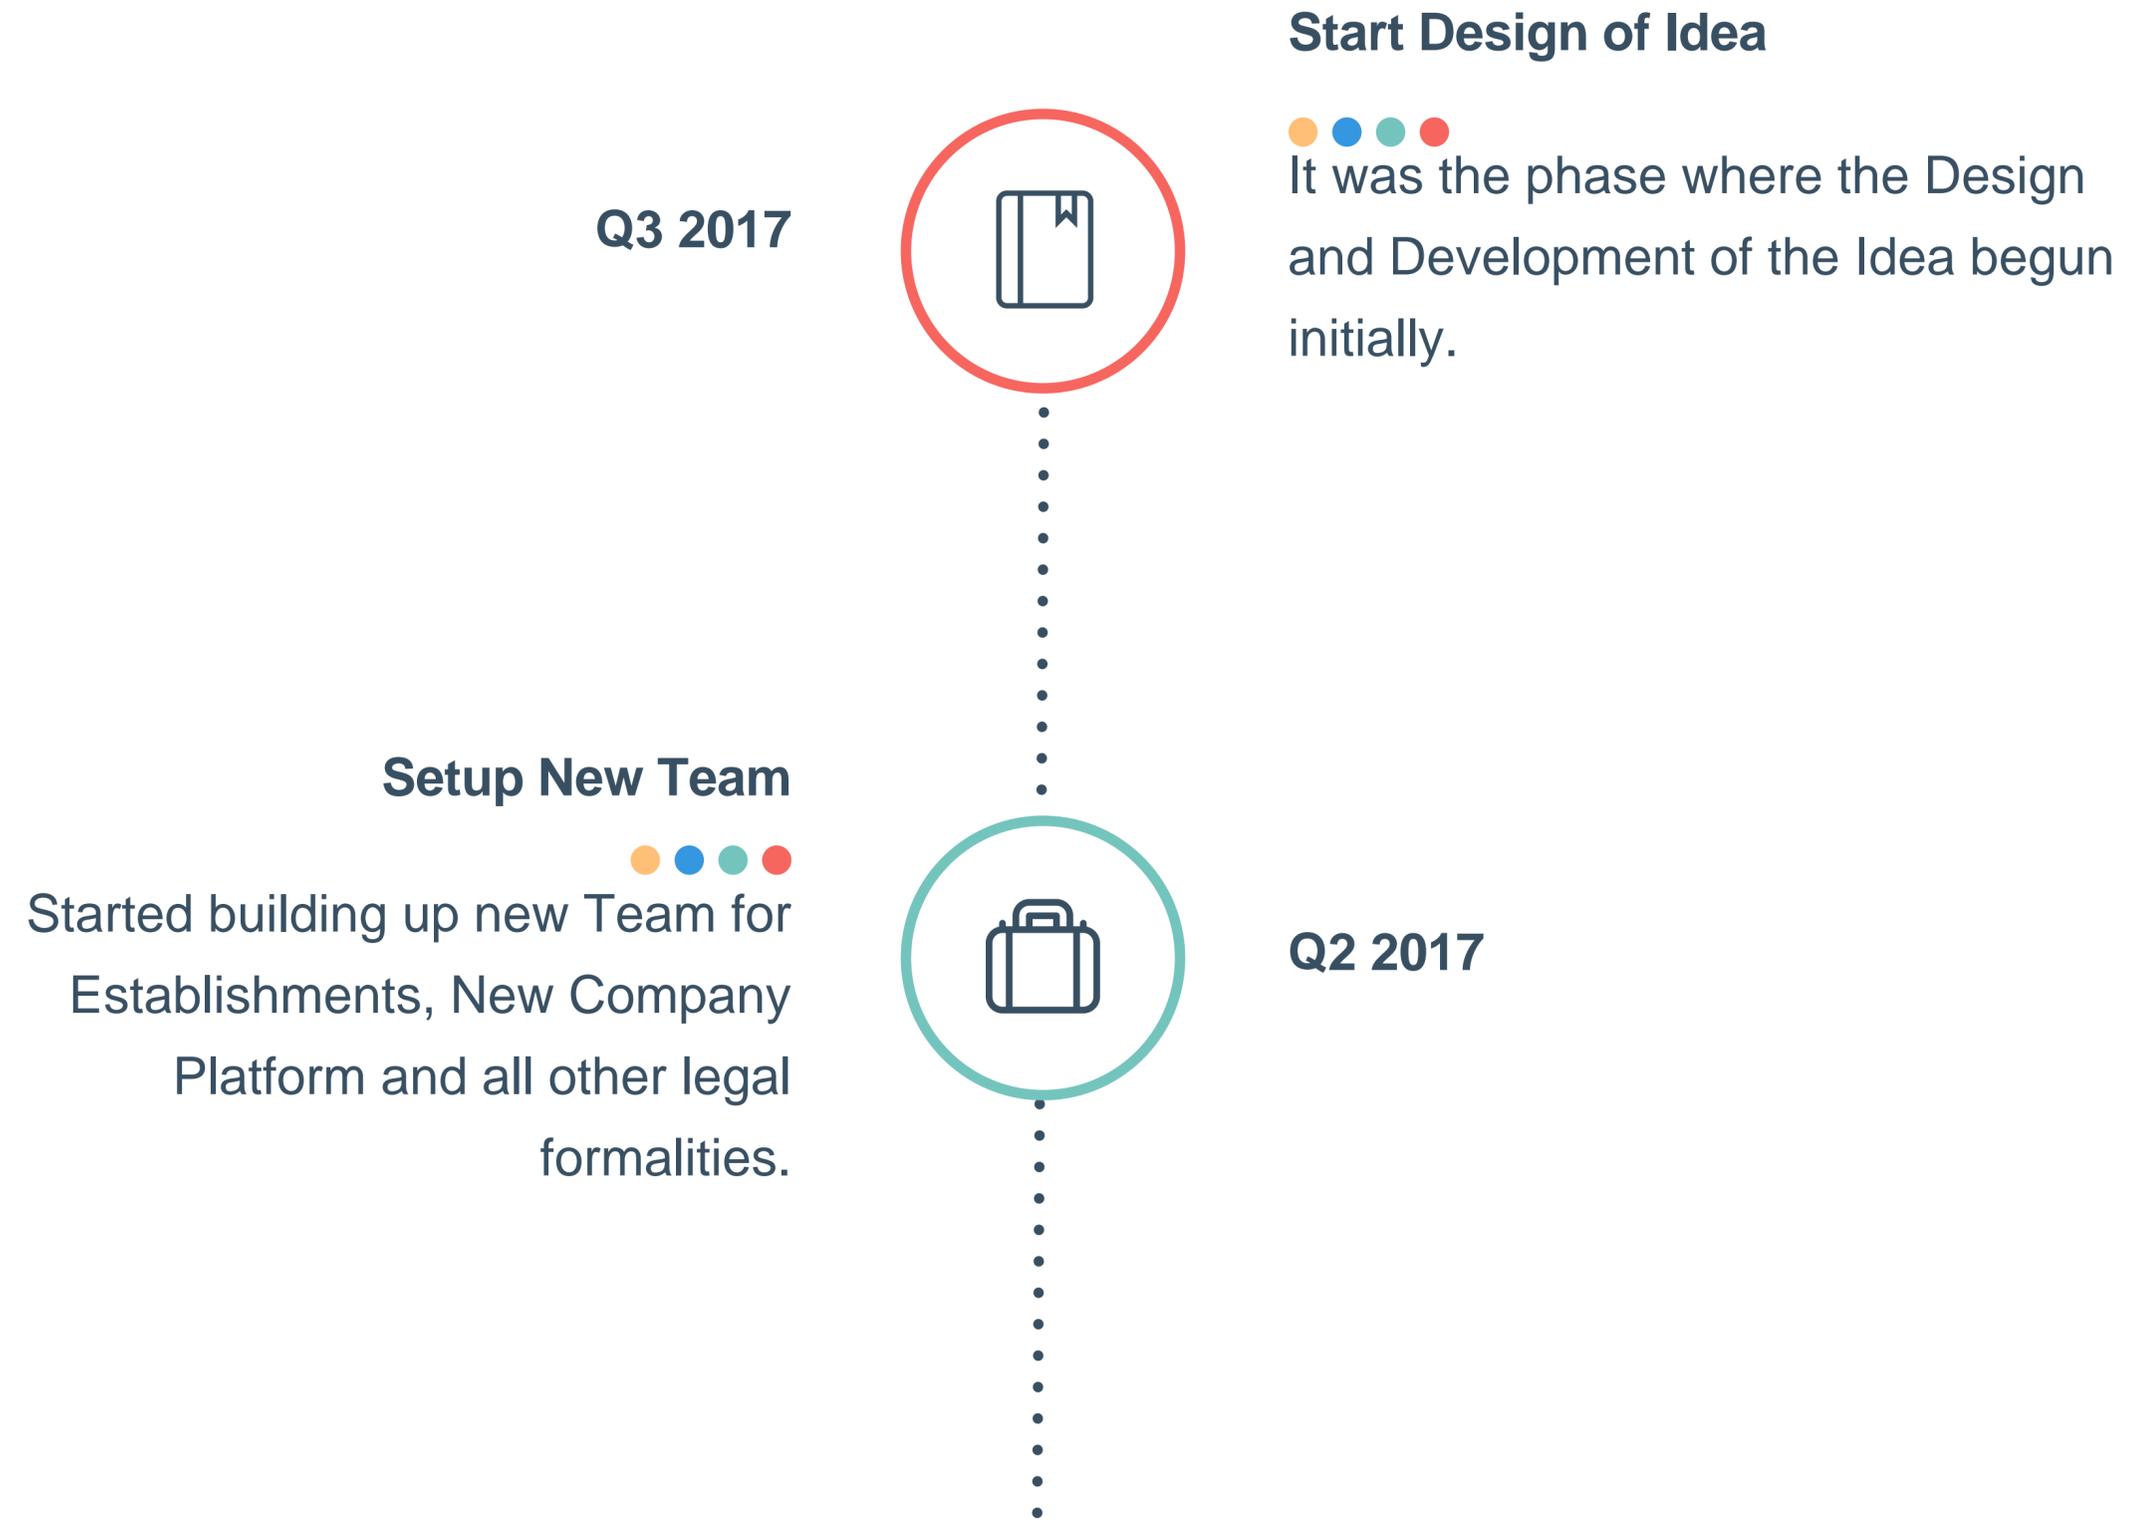

Customizable Interface:

Another important feature it has implemented is it allows to organize and set up your workspace as per your preferences. Avails many settings which can be customized as per needs.

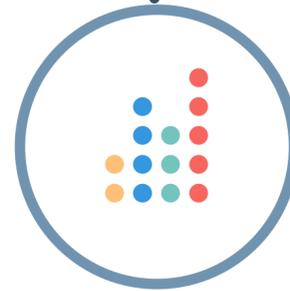

Security:

We have followed the algorithms to design a moderate platform and it highly believes that Security of the user information and every individual data is the first priority. Therefore, we maintain the high Security Features, Data Validations and Integrations.

OUR ROADMAP

Q1 2018

Start Development

Develop the first version of crypto currency and its exchange platform had begun. Other workouts such as partnerships, corporate responsibility took place parallel.

Soon it completes App development it will move towards API integrations and it's Launch.

Q2 2019

Q3 2018

Exchange security enhancement

In this phase, the priority will be given to the enhancement of the Security of Platform to keep all your Data safe and secure and to make the Platform completely Reliable.

SECURED DIGITAL PLATFORM

You're at Safe Place

Security is vital when building any asset management platform. Our platform integrates technology which security features implements to prevent spoofing, such as a secret color and code word presented to the user in each popup window. Our Platform actively protects users from known scammers by forcing a redirect when it encounters a known malicious website. Due to such security reasons and policy we cannot disclose the technology used for our Platform.

3 EASY STEPS FOR YOUR DIGITAL WALLET

01

Create Wallet

Create your own wallets which offer one of the highest levels of security against hacking or a virus so your will not lose your funds. It makes the transaction easy. Safely store all your essential credit and tokens details within your wallet.

02

Make Payment

It offers you the opportunity to embrace crypto currency, mobile pay and many more digital money opportunities that just may make your life less cumbersome and more streamlined in our ever-changing cyber race. Your digital wallet might even unlock the doors to your house. Start paying via Tokens easily through your digital wallet.

Buy or Sell

A digital wallet could alter the way you buy or sell crypto currency and its operation in general. From here buying and selling crypto currency is as simple as filling out a form and waiting for the transaction to process. Once you complete the steps you are all set to alter the ways of crypto currency trading as per your preference.

And lastly, between 16th August, 2018 to 31st August, 2018 if any customer pays 1 Ethereum then SFX distribution will decrease to 500 for that customer.

For better understanding please see ICO Distribution Price Chart.

Buy SFX Date between	Ethereum	Stockfinex
15 th July, 2018 to 31 st July, 2018	1	700 SFX
1 st August, 2018 to 15 th August, 2018	1	600 SFX
16 th August, 2018 to 31 st August, 2018	1	500 SFX

REVENUE SHARING PROGRAM

Our Revenue Sharing Program will be completely based on Ethereum defined as ERC20. We will create 21 million Tokens completely based on Ethereum ERC20 for our platform Stockfinex Exchange. Tokens have been named on our Platform's names. They will be known as Stockfinex. They can also be referred to by the Ticker known as SFX. The SFX is a token on the Ethereum platform. Its design follows widely adopted token implementation standards. This makes it easy to manage using existing solutions including Ethereum Wallet.

- ✓ English Name of Token: Stockfinex
 - ✓ Ticker of Token: SFX

HOW OUR REVENUE SHARING PROGRAM WORKS

Our Revenue Sharing Program will be launch on 1-Jan-2019. As we mentioned earlier, it will be based on SFX Tokens. Professionals who are willing to join can invest in Revenue Sharing Program with their SFX Tokens. Professionals who invest will become eligible for receiving Revenue Distribution twice a Month. Revenue Distribution Program will further be divided into two timelines. First will be from 1st to 15th of every month and Second will be from 16th to 31st of every month. If a Professional invests between first timeline i.e. from 1st to 15th will become eligible for Receiving Revenue Distribution during second timeline i.e. 16th to 31st of the month. Revenue will be Distributed in the form of USDT Coins to the investors.

Also the Professional who wishes to invest in Revenue Sharing but doesn't hold any SFX Tokens can purchase new SFX Tokens as per the current market scenario and can carry out the Further Activity.

Also, if any of the Investor wishes to exit the Revenue Sharing Program then he would not be eligible for Receiving the Revenue Distribution for the timeline in which he exits i.e. if a Investor exits in First timeline between 1st to 15th of a month, then he/she will not be eligible for Receiving Price Distribution of the First Timeline.

Let's say, There is a Total investment of 2000 SFX Tokens in the Revenue Sharing Program and 2,00,000 is the Total Profit generated. Then this Profit will be divided among the Total investment and will be distributed among the Distributers accordingly.

Revenue Sharing Launch Date: 01-Jan-2019

Revenue Sharing Investment: SFX Tokens

Revenue Sharing Distribution: USDT Coins

Revenue Sharing Timeline: Twice a Month
